

Part #: **B9000-F2L-B-E0 D-AB**

The B8000 and B9000 Doublewall VPH DEF UDC's are available in models for DEF dispensers. It features an electrical offset frame to eliminate the need for conduit penetrations. It has a split frame design to provide easy access for the DEF compartment. It comes with a divider already installed for heated cabinet dispensers.

The B8000 and B9000 Doublewall VPH DEF UDC's are manufactured from fuel compatible resin that don't require gel coat for corrosion resistance, greatly reducing the time and labor to install rigid FRP entry fittings. All metal work is galvanized and epoxy coated for superior corrosion resistance.

This series ships under a continuous 20" Hg vacuum test.

SIZES

B8000 - 20" Wide at Base

B9000 - 29" Wide at Base

MATERIAL

Tank-spec doublewall fiberglass

Epoxy coated galvanized steel

Doublewall construction allows for constant monitoring.

SPECIFICATIONS:

- 30-year corrosion warranty
- Diesel exhaust fluid (DEF) - separate compartment and frame
- Quality FRP construction
- Interstice can be monitored hydrostatically or with vacuum
- AB2481 compliant in California
- Preplumb options available
- Split frame design for easy access
