

Part #: **B480x32-50T-DB-MW**

The Tank Sump Tall Collar Doublewall VPH with the octagon shape provides the greatest access to pipe at 45- and 90-degree angles. It features a snap-lock lid with vertical o-ring seal to make it water-tight. It comes with a 30-year corrosion warranty. There is a v-groove pour channel to join the two-piece containment sump eliminating the need for lamination. The pour channel allows communication between the base and the top hat. The base of the tall collar can be applied by the tank manufacturer or saddle cut at the factory to speed up installation.

The upper portion, or top hat, of the tank sump ships under a continuous 20" Hg vacuum test. The Tank Sump Collar Mount Doublewall is constructed from fuel compatible resin that doesn't require gel coat for corrosion resistance. This reduces the time and labor required to install rigid FRP entry fittings.

### SIZES

42" or 48" diameter  
32" or 36" reducer

### MATERIAL

Fiberglass

### SPECIFICATIONS:

- 30-year corrosion warranty
- Quality FRP construction
- Available in split configuration
- AB2481 compliant in California
- Split version is height adjustable in the field
- Easy slurry pour channel
- Fuel compatible resin doesn't require gel coat
- Kit includes installation accessories and pour channel slurry
