

Part #: **B500-F3S-BD-AB**

The Transition Sump B500 Series Doublewall VPH is compatible with common motor fuels. This transition sump can be ordered with standard AST fittings pre-installed and it comes with mounting points for a rack system which is optional. The standard Transition Sump B500 Series Doublewall VPH can accommodate up to 3 fittings on the smaller sump and up to 5 on the larger size. The fittings range from electrical offset (EO) to 3" compression pass-through AST fittings.

This series comes standard with positive concrete anchoring and ships under a continuous 20" Hg vacuum test.

SIZES

Small 24 1/2"
