

Part #: **B600-F3S-B**

The Transition Sump B600 Series Singlewall is compatible with all common motor fuels. This transition sump can be ordered with standard AST fittings pre-installed and it comes with mounting points for a rack system which is optional. The standard Transition Sump B600 Series can accommodate up to 3 fittings on the smaller sump and up to 5 on the larger size. The fittings range from electrical offset (EO) to 3" compression pass-through AST fittings. The walkover, bolted-down diamond plate cover allows for pedestrian foot traffic.

Drain lines for surface water drainage channels, and positive concrete anchoring, come standard with this series.

SIZES

Small 24 1/2"

Large 42"

MATERIAL

Fiberglass

Epoxy coated galvanized steel

SPECIFICATIONS:

- 30-year corrosion warranty
