

Part #: **B-640-D-AB**

The Transition Sump B600 Commercial Series Doublewall VPH is compatible with all common motor fuels. This sump series can be ordered with standard AST fittings pre-installed. The interior has C-channel for hanging hardware. The walkover, bolt-down diamond plate cover allows for pedestrian foot traffic. Extra long flat walls allow for easier access to plumb fittings. Will accommodate above-ground transition to underground transition piping systems. These are used predominantly to allow building access to your generator.
