

Part #: MW42

The Titan Composite Manway Cover far exceeds the load ratings required in forcourt applications. With both H-25 and EN124-C250 ratings it is one of the most durable covers on the market today. It's light weight and custom non-skid surfaces help prevent work place injuries. The Titan features a one-piece composite skirt and frame giving it a huge corrosion resistance advantage over traditional steel skirts. The stainless steel handle doubles as a pry point rated at 1100 lbs. pull.

SIZES

36" frame opening
42" frame opening

MATERIAL

Fiberglass cover
Fiberglass skirt/frame
Stainless steel handle

SPECIFICATIONS:

- Easy-to-use handle to remove cover
- Exceeds test ratings for EN-124 (EU) and H-25 (US)
- Water-tight o-ring seal available
- No corrosion with composite material
- Light weight
- Non-skid surface
