

Part #: **B-8700-1PL 7.13.16**

The B8700 above ground transition containment is typically used for fixed point piping to floating docks or marinas to protect control valve equipment and flow-meter equipment.

SIZES

Depth 17-1/2", Width 25"

Length –

Small 30", medium 36", large 44"

MATERIAL

Galvannealed epoxy powder coated steel

Available in stainless-steel

SPECIFICATIONS:

- Used to protect sensor equipment for piping
- Compatible with mechanical and electronic shut-down devices
- Bravo float trip reservoir and mechanical automated shut-off optional
- Ideal for fixed point piping to floating docks or marinas
