

Part #: Conv-2000-220 to 38x-OPP-LP

The Conversion Frame Flush Mount is in full compliance with ADA height requirements. They are made with rugged, reinforced 12-gauge steel construction and come completely equipped with anchor bolts, frame caps and all mounting accessories. The conversion frame easily adapts to an existing UDC as a new dispenser is installed and features an integrated water splash lip and drainage panels. Bravo has been manufacturing conversion frames for more than three decades.

By using a Conversion Frame you can ensure proper hydraulic cabinet containment when placing a larger dispenser over an existing sump.
