

Part #: F-30-FF

The FF series entry fitting is the most cost effective rigid FRP entry fitting on the market. It's double sided flange design provides ease of installation as well as a redundant water-tight seal. Constructed of quality fuel compatible fiberglass the FF series fittings features an industry leading 30-year corrosion warranty. This versatile pass through fitting can be used with both series and parallel piping layouts. Models are available for size over size and LCX piping as well as rigid electrical conduit.
