Aboveground Containment Solutions

Containment solutions for commercial, retail, and marina applications

A6000-EZ SERIES

The A6000-EZ pedestal sump provides dispenser containment in both aboveground and marina fuel applications. These units come pre-assembled for quicker installations. Just set it in place and mount your dispenser.

- Factory assembled for your dispenser
- Welded 2-inch coupling requires no entry fitting
- Configured for Wayne & Gasboy models
- All stainless internal piping

A500 SERIES

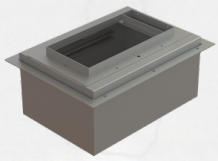

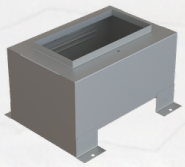

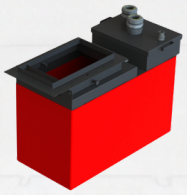

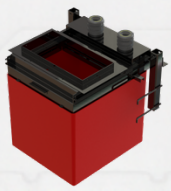

- A523 Dockside Camlock Box
- A524 Landside Breakaway Box

Watertight, stainless steel transition sump. The A523 is designed for installation on each dock section for seasonal and emergency disconnection of fuel lines. The A524 is designed for landside transition from rigid pipe to marina pipe and includes mounting for breakaway and breakout panels for each pipe run. Manufactured per PEI Marina Best Practice RP-1000.
