

EZ CONNECT

Bravo EZ Tees and 90s are engineered to save space, with a shorter, more compact profile than competitive products — **freeing up critical inches inside the UDC.**

Built from **all-stainless steel**, they deliver unmatched corrosion resistance and full compatibility with today's most common fuels. Multiple configurations are available for all major piping systems, and the EZ connections ensure **quick assembly and simple maintenance.**

Pair with a Bravo stainless riser or stainless flex connector for a **complete corrosion-free system** that's easy to install, easy to service, and ready to handle the fuels of today — and tomorrow.
