

Sump Lid for FRP Sumps

RETROFIT TANK SUMP LIDS

OVERVIEW:

Bravo's RC series retrofit water-tight sump lids are designed to be installed on any FRP tank sump. The RC Series lid kit permanently attaches a Bravo reducer with an integrated O-ring seal to accept the snap-lock lid. The lid features an integrated pressure/vacuum valve to avoid a build-up of vacuum inside the sump. Step-to-seal design and quarter turn locks provide easy operation. The existing reducer I.D is the only measurement needed to select the correct lid.

SIZES:

- 32" and 36" diameter cover

*See page 2 for dimensions drawing and chart

MATERIALS:

- Tank-grade fiberglass material allows our product to be exposed to fuels
- No secondary protective gel coat needed

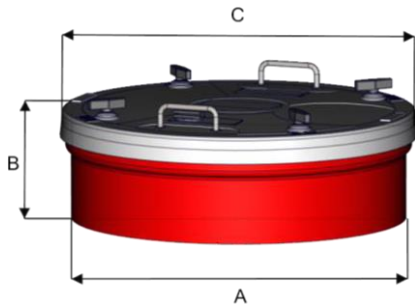

SPECIFICATIONS:

- Lid seals simply by stepping on it, then turn the handles to lock position
- No nuts or removable parts to lose
- Anti-water PV valve prevents pressure or vacuum from building
- Tested to be water-tight under 5' of water
- Lamination kit included for installation

Sump Lid For FRP Sumps

RETROFIT TANK SUMP LIDS

Required Tool Kit
