About the B1000/7000 Combo

Bravo's DEF combination UDC's are offered in the both the B7000 and B1000 series. These UDC's not only provide containment for the hydraulic cabinet but have a separate compartment for DEF containment. These UDC's provide containment for the hydraulic cabinet and can be ordered with a divider to separate the compartment for heated DEF containment. Being compartmentalized isolates the DEF containment heaters from the fuel side of the dispenser while still allowing leak detection. Manufactured from fuel compatible resin that doesn't require gel coat for corrosion resistance. Available in singlewall or doublewall VPH configurations that are AB2481 compliant and exempt from triennial testing when constantly monitored.

SIZES

- 28" width at base

**See page 2 for dimension drawing and dimension chart*

MATERIAL

- Fiberglass
- Epoxy coated galvanized steel
- Quality FRP material won't deform like polyethylene

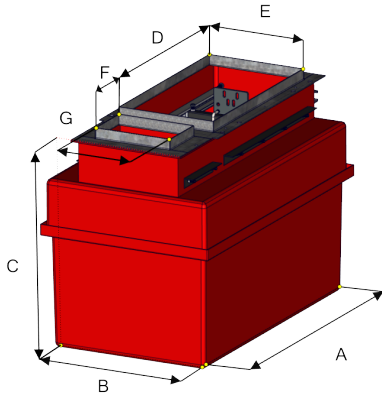

SPECIFICATIONS

- Models for all popular DEF dispensers
- Doublewall models are triennial testing exempt
- Gel coat and paint free
- Electrical offset frame eliminates the need for conduit penetrations
- Separate DEF containment chamber
- 30-year corrosion warranty
- UL2447

B1000/B7000
