About the Closed-Bottom Doublewall VPH FRP Tank Sumps

The octagon-shaped closed bottom doublewall tank sump is ideally configured for piping laid out in 45- and 90-degree angles. It is field height adjustable and features a pour channel that makes for a simple PC slurry pour joining the sump base and top hat. It comes standard with a snap-lock lid with vertical O-ring seal

to make it watertight with other lid options available. It is VPH compliant and can be used as a transition sump or be riser adaptor mounted outside of California. It ships under 20" HG vacuum to ensure wall integrity.

SIZES

- 42" or 48" diameter
- 32" or 36" reducer

**See page 2 for dimension drawing and dimension chart*

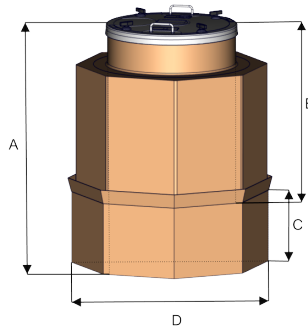

MATERIAL

- Fiberglass

SPECIFICATIONS

- Quality FRP construction
- Split configuration is height adjustable
- Fuel resistant doesn't require gel coat for fuel resistance
- Doublewall is suitable for constant monitoring-triennial testing exempt
- 30-year corrosion warranty
- UL2447 listed

42" Diameter Closed-bottom Doublewall VPH FRP

Sump Type	Part # with 32" SL lid	Part # with 36" SL lid	Part # with 32" Twist-Lock lid	Min/Max	A	B	C	D
