About the Closed-Bottom Singlewall FRP Tank Sumps with Lids

The octagon-shaped closed bottom singlewall tank sump is ideally configured for piping laid out in 45- and 90-degree angles. It is field height-adjustable and features an easy slurry pour channel to join the sump base and top hat. It comes standard with a snap-lock lid with vertical O-ring seal to make it watertight with other available lid options. It can be riser adaptor or reverse flange mounted. Bravo offers FRP riser adaptors for both 4" and 6" tank bungs.

SIZES

- 42" or 48" diameter
- 32" or 36" reducer

**See page 2 for dimension drawing and dimension chart*

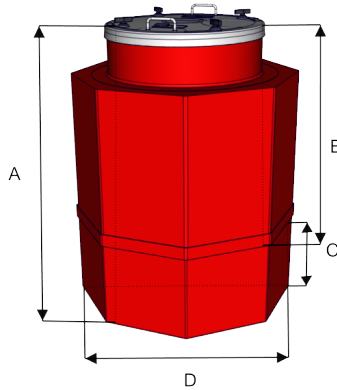

MATERIAL

- Fiberglass

SPECIFICATIONS

- Quality FRP Construction
- Two-piece configuration is height-adjustable
- Fuel resistant doesn't require gel coat for fuel resistance
- Epoxy pour channel saves installation time
- 30-year corrosion warranty
- UL2447 listed

42" Diameter Closed-bottom Singlewall FRP

Sump Type	Part # with 32" SL lid	Part # with 36" SL lid	Part # with 32" Twist-Lock lid	Min/Max	A	B	C	D
